DETAILED ACTION

Response to Amendment

1. Applicant's amendment filed on December 5, 2005 has been entered. Claims 1, 5-10 and 15 have been amended. No claim has been cancelled, or added. Claims 1-20 are still pending in this application, with Claim 1 being independent.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in a telephone interview with David Banner (Reg. No. 39,898) on February 1, 2006.
4. The application has been amended as follows:

Claim 1, lines 24 and 25, "unenergized state, visibility through said single transparent panel signaling apparatus is substantially unoccluded.

Allowable Subject Matter

5. Claims 1-20 are allowed.
6. The following is an examiner's statement of reasons for allowance:

Applicant teaches a signaling apparatus including a single substantially transparent panel adapted to be mounted to a vehicle window, a light emitting element affixed to the panel, and substantially transparent means for delivering power to the light emitting element, such means being positioned on at least one surface of the panel. Means for controlling energization of the light-emitting element are also provided. The signaling apparatus is substantially transparent when the light-emitting element is in an unenergized state.

Biferno (U.S. Pat. 4,568,928) discloses a back-up display system including an electroluminescent display, a second display means, and background means located between the electroluminescent display and the second display means. The electroluminescent display and the background means are substantially transparent when not energized, allowing the second display means to be seen therethrough. No motivation was found to remove the second display means from the patented structure of Biferno to obtain the claim invention.

No prior art was found teaching individually, or suggesting in combination, all of the features of the applicants' invention, specifically a single substantially transparent panel having a light emitting element affixed thereto, such signaling apparatus being

substantially transparent when the light emitting element is inactive, in combination with the claimed signaling apparatus.

7. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
